

## REMARKS AND ARGUMENTS

Claims 1, 3 and 7-15 are pending in the present application, of which claims 1, 9 and 10 are independent. Claims 2 and 4-6 were cancelled in a previous paper. Claims 1, 3 and 7-10 have been amended. New claims 13-15 have been added. Support for the amendments to the claims, and for new claims 13-15 is found in the specification as detailed in the table presented below. New range endpoints are drawn from data points in the examples; each data point used displays synergy against at least one microorganism. The MPEP allows use of data points from the examples to create new range endpoints in the claims. See M.P.E.P. § 2163.05(III).
